

# Castellated Floor Panels

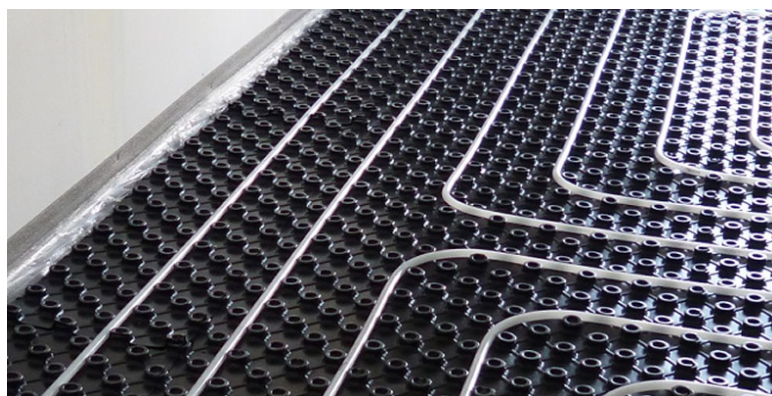

## UNDER FLOOR HEATING

### The Product

With JCW Castellated Floor Panels installation times are reduced significantly and pipes are easy to position whilst also being held securely in place.

### Advantages

- Easy to Install
- Quick & easy positioning of pipes
- Easy to calculate
- Minimal Wastage
- Eliminates pipe contact with insulation
- Even distribution of temperature
- EPS insulation panels available
- Direct application to existing insulation
- Total solution for both insulation and installation of the floor heating pipes

### Material Features

- Castellated insulation panels are interlocking
- Produced in high density polystyrene
- Plastic top finish acts as a moisture barrier

### Installation Instructions

- Place directly onto (existing) insulation and clip heating pipes into panels

### Technical Specification

- Castellated floor panels are designed to simplify the procedure of preparing the floor for heating pipes. They are an alternative to clip rails or staples
