

Castellated Floor Panels

UNDER FLOOR HEATING

The Product

With JCW Castellated Floor Panels installation times are reduced significantly and pipes are easy to position whilst holding the underfloor heating pipes in place.

Advantages

- Easy to Install
- Quick & easy positioning of pipes
- Easy to calculate
- Minimal Wastage
- Eliminates pipe contact with insulation
- Even distribution of temperature
- EPS insulation panels available
- Direct application to existing insulation
- Total solution for both insulation and installation of the floor heating pipes

Installation Instructions

- ∇ Place directly onto (existing) insulation and clip heating pipes into panels

Technical Specification

Castellated floor panels are designed to simplify the procedure of preparing the floor for heating pipes. They are an alternative to clip rails or staples

Material Features

Castellated insulation panels are interlocking
reduced in high density polystyrene
lastic top finish acts as a moisture barrier
