

# Pipe De-coiler

## UNDER FLOOR HEATING

### The Product

The JCW Pipe De-coiler is a useful tool which allows the unrolling of underfloor heating pipe in a quick and controlled manner during the installation of piping for wet underfloor heating systems.

### Product Specification

The JCW Pipe De-coiler will accept up to 500 metres of pipe which can be quickly and tidily unrolled during the installation of underfloor heating systems, helping keep the workplace tidy and hazard free and speeding up the installation process.

### Advantages

- Ensures a tidy working environment and the controlled handling of up to 500 metres of underfloor heating pipe
- Using a JCW Pipe De-coiler minimises damage and tangling to underfloor heating pipe
- Facilitates the installation of pipework by a single person
- Can be used with all types and sizes of underfloor heating pipes
- Easy to assemble and manufactured from robust materials

### Technical Data

Tube Length	Dimensions after assembly (mm)	Height after assembly (mm)	Weight without pipe (kg)
Max 500mtr (16mm Diameter)	1200 total	Minimal 170 Maximal 520	8.5
